

# Lim Kim Hoong

Data Scientist | Former Data Analyst & AI Engineer

Specializing in Predictive Analytics, AI Solutions, and Data-Driven Insights

+60 11-1019 9427 | kimhoong0324@gmail.com | [LinkedIn](#) | [GitHub](#) | [Personal Website](#)

## SUMMARY

Results-driven Data Scientist with 5+ years of experience delivering end-to-end analytics, machine learning and automation solutions across financial services, cryptocurrency and HVAC industries. Proven track record in developing predictive models, optimizing operational workflows, and translating complex datasets into actionable business insights for strategic decision-making. Strong expertise in Python, SQL machine learning, data visualization and cloud-based analytics platforms. Experienced in leading cross-functional analytics initiatives and deploying scalable AI solutions in production environment.

## PROFESSIONAL EXPERIENCES

### Data Scientist, Azendian Solutions Pte. Ltd.

Nov 2024 – May 2026

- Developed predictive, forecasting and optimizing models for HVAC analytics solutions, supporting energy efficiency improvement and operational performance monitoring
- Led end-to-end machine learning and analytics initiatives, from data acquisition and feature engineering to model deployment and monitoring
- Collaborated with cross-functional engineering and business teams to deliver scalable AI-driven solutions aligned with client requirements
- Designed automated analytics workflows and data pipelines to improve processing efficiency and model reliability
- Sole Contributor to Fault Detection and Diagnosis (FDD) and Anomaly Detection for AHUs and utility consumptions using machine learning techniques

### AI Engineer, Userdata Sdn. Bhd.

May 2024 – Nov. 2024

- Designed and deployed machine learning and NLP solutions using Python and open-source large language models (LLMs) for enterprise chatbot applications
- Enhanced chatbot response accuracy and inference performance through prompt optimization, model evaluation and integration of advanced NLP techniques
- Delivered technical consultation and backend AI implementation support for internal product development teams
- Integrated modern AI frameworks and vector database solutions to improve information retrieval and contextual response generation
- Achieved 1<sup>st</sup> place in a team-based hackathon by developing innovative solutions for addressing real-world production issues

### Senior Data Analyst, OKX

Aug. 2023 – Apr. 2024

- Performed large-scale data cleaning, transformation, validation and exploratory analysis on cryptocurrency transaction datasets using Python and VBA
- Developed automated web scraping and workflow solutions using Python and Selenium, reducing manual processing effort by approximately 80%
- Improved operational reporting efficiency by streamlining data extraction and reconciliation processes
- Supported business decision-making through analytical reporting

### Data Analyst, Bursa Malaysia Berhad

Dec. 2020 – Aug. 2023

- Developed and enhanced VBA-based automation frameworks and data infrastructures, improving processing efficiency and reducing operational turnaround time by 50%
- Designed and maintained interactive Power BI dashboards for operational monitoring and business reporting, improving real-time visibility and reporting efficiency by 30%
- Automated data verification and validation workflows for Bursa Trade Securities 2 Technology Refresh project using Python, reducing verification time by 90% and achieving 0% error rate
- Conducted data analysis and reporting to support operational and strategic initiatives within capital market operations
- Collaborated with stakeholders across technology and business teams to improve reporting accuracy and process scalability

### Data Analyst Intern, IBM Corporation

Oct. 2019 – Dec. 2019

- Supported data collection, cleansing, validation and exploratory analytics activities using Excel and internal analytical tools
- Assisted in preparing datasets and analytical reports for business and operational use cases

## SKILLS

|                                 |                                                                                                                 |
|---------------------------------|-----------------------------------------------------------------------------------------------------------------|
| Programming and Query Languages | Python, R, Microsoft SQL, VBA                                                                                   |
| Machine Learning and AI         | Predictive Modelling, Clustering, NLP, Computer Vision, Feature Engineering, Model Evaluation                   |
| Libraries and Framework         | Scikit-learn, TensorFlow, PyTorch, Pandas, NumPy, Matplotlib, Plotly, Streamlit, Flask, FastAPI, ChromaDB       |
| Data Visualization and BI       | Power BI, Tableau, Excel, Draw.IO                                                                               |
| Cloud and Data Platforms        | AWS (S3, Glue, SageMaker), MySQL, PostgreSQL, Microsoft SQL                                                     |
| Tools and Technologies          | Jupyter Notebook, VS Code, RStudio, Spyder, SAS Enterprise Miner, Talend Data Preparation, UI Path, Claude Code |

## EDUCATION

### Universiti Malaya (UM), Malaysia

Master of Data Science (Distinction) Mar. 2022 – Jul. 2023

· Major: Computer Vision

· CGPA: 3.98 / 4.00

· Relevant Coursework: Data Analytics, Machine Learning, Parallel and Distributed Computing, Numerical Optimization, Big Data Management

### Universiti Tunku Abdul Rahman (UTAR), Malaysia

Bachelor of Science (Honours) Financial Mathematics (Distinction) May 2017 – Oct. 2020

· Major: Automated Stock Trading in Python

· CGPA: 3.59 / 4

· Relevant Coursework: Operation Research, Financial Economics, Predictive Modelling, Time Series Analysis

· Achievements: President's List (Oct 2018 & May 2019), Dean's List (May 2018, Jan 2019), Distinction in Soft Skills Development Certificate Program (USSDC)

## PROJECTS

**Anomaly Detection on Power and Water Consumption** Nov. 2024 – Apr. 2026

· Developed a real-time anomaly detection solution for utility consumption monitoring using machine learning models

· Improved abnormal usage detection capability for operational monitoring and preventive maintenance initiatives

**RFM Score Prediction for Customer Transaction in Bank** [\[Code\]](#)

Sep. 2024

· Built a Random Forest Regression model for customer RFM score prediction using banking transaction data

· Achieved a Mean Squared Error (MSE) of 0.005 through feature engineering and model optimization techniques

**Robotic Process Automation (RPA) for Reference Price Adjustment (RPA)**

Apr. 2023 – Aug. 2023

· Automated approximately 80% of manual operational workflows using UiPath for end-to-end reference price adjustment processing

· Reduced manual intervention and improved operational consistency and efficiency

**M16 Touri-Scope Dashboard in R programming language** [\[Website\]](#) [\[Code\]](#)

Mar. 2022 – Jun. 2022

· Developed an interactive analytics dashboard in R to visualize global tourism trends before and after the pandemic

· Enabled data-driven insights through trend analysis, visualization and KPI monitoring
